

# BABY TRIVIA

- Just a few days after birth, a newborn's stomach is about the size of a \_\_\_\_\_.
  - pine nut
  - pumpkin seed
  - walnut**
  - tangerine
- Within the first few weeks of birth, a baby typically \_\_\_\_ of their original body weight.
  - gains 5%
  - gains 10%
  - gains 15%
  - loses 5 to 10%**
- By the time babies are \_\_\_\_ old, they would weight about double what they weighted when they were born.
  - 2 to 3 months
  - 4 to 6 months**
  - 7 to 9 months
  - 10 to 12 months
- Can babies taste while inside the womb?
  - Yes, absolutely!**
  - No way!
  - Maybe; there is not enough evidence on this yet.
- Babies start to pee while still in mommy's belly around week \_\_\_\_\_.
  - 8**
  - 15
  - 30
  - Babies do not pee while inside the belly!
- Babies generally start to smile at around \_\_\_\_\_.
  - birth
  - 2 weeks
  - 1 month
  - 2 months**
- While an average adult has about 10,000 taste buds, a newborn baby has about \_\_\_\_ taste buds throughout their mouths.
  - 5,000
  - 15,000
  - 30,000**
  - 100,000
- A baby's vision does not generally attain 20/20 until about \_\_\_\_\_.
  - 9 months
  - 18 months
  - 2 to 3 years of age**
  - 4 to 5 years of age
- At around 36<sup>th</sup> week of pregnancy, the baby is surrounded by about \_\_\_\_ of amniotic fluid.
  - 1 cup
  - 1 quart**
  - 0.5 gallon
  - 1 gallon
- As the pregnancy progresses, the dominant ingredient in the amniotic fluid becomes \_\_\_\_\_.
  - the baby's urine**
  - water from the mother's body
  - breast milk
  - blood
- If both mommy and daddy's eyes are blue, it is genetically impossible for their biological baby to have brown eyes.
  - True
  - False**
- By the age of \_\_\_\_, a child's brain is similar to the size of an adult's brain.
  - 2
  - 3**
  - 5
  - 10
